Stellaris® FISH Probes, Mouse Tfrc with Quasar® 570 Dye

Stellaris® FISH Probes, Mouse Tfrc with Quasar® 570 Dye consists of a set of dye-labeled oligos mixed and pooled into a final delivered amount of 5 nmol, which yields approximately 200-400 hybridizations under standard conditions. Designed to detect Tfrc transcripts in specimens using fluorescence in situ hybridization (FISH).

Design Criteria: Product was designed against transferrin receptor Tfrc a.k.a. TR; TFR; p90; CD71; TFR1; Trfr; Mtvr1; Mtvr-1; AI195355; AI426448; AU015758; 2610028K12Rik; E430033M20Rik (NCBI gene ID:22042) and nucleotides 165-2456 of NM_011638.4. This is an inclusive probe set designed to also detect the following variant: XM_006521999 The probe set has not been tested for potential cross-hybridization to RNA(s) of paralogous and orthologous gene(s) in the same or other species.

Properties

Absorption Maximum (Lambda Max): 548 nm
Fluorescence Maximum: 566 nm

Product Usage

Additional Information: Please note that reconstituted probe mix should be subjected to a minimum number of freeze-thaw cycles. For daily and short-term use, the mix can be stored at +2 to +8 °C in the dark for up to a month.
For long-term use: We recommend freezing reconstituted probes in the dark at -15 to -30 °C for storage lasting longer than a month.
Protocols: Detailed protocols by sample type can be found here: https://www.biosearchtech.com/stellarisprotocols.

Shipping & Handling

Shipping Conditions: Ambient
Storage Conditions: +2 to +8 °C

Trademarks
Biosearch, the Biosearch Technologies logo, Black Hole Quencher, BHQ, BHQplus, CAL Fluor, Quasar, Pulsar, Stellaris and SuperROX are registered trademarks of Biosearch Technologies, Inc.

Permitted Product Usage
All products offered for sale by Biosearch Technologies, Inc. (BTI) are sold under the condition that they be used for research purposes only and are prohibited from use in diagnostic or other commercial applications unless explicitly authorized by separate written agreement with BTI.

Black Hole Quencher® (BHQ), CAL Fluor®, Quasar® and Pulsar® dyes (referred to collectively as “BTI Dyes”) are sold to the purchaser only for internal R&D use, and are not to be used for clinical or diagnostic purposes. Neither the BTI Dyes nor the compounds synthesized with them are to be re-packaged or re-sold. Separate licenses to the BTI Dyes may be available for applications other than the aforementioned internal R&D. Please inquire via info@biosearchtech.com.

Patents
The Black Hole Quencher dye technology is protected in the United States and other countries by U.S. patents and continuations numbered 7,019,129, 7,019,129B1, 7,109,312B2, 7,582,432, 8,410,259B2 and 8,440,399B2 issued to Biosearch Technologies, Inc. The CAL Fluor technology is covered by U.S. patent number 7,344,701B2.

Supercolumns are protected by U.S. Patent 6,761,855 B1, "Column for solid phase processing” issued to Biosearch Technologies, Inc. Contact licensing@biosearchtech.com for more information. Supercolumns for use on ABI 3100 or equivalent rotary cartridge style shoulder mount design are also manufactured under license from McLuen Design, U.S. Patents 8,158,085 and 8,404,196.

Stellaris products are sold under license from Rutgers University and may be used under its patent rights for Research Use Only.

Licensing
Information on licensing programs for the commercial and/or diagnostic use of these products is available by contacting licensing@biosearchtech.com.
